

Benzina Mohamed

Software Developer | Next.js & React.js | React Native

benzina2mohamed@gmail.com | +213552320017 | Bordj El Kiffan, Algiers, Algeria | [GitHub](#) | [LinkedIn](#) | [me](#)

SUMMARY

Enthusiastic and passionate software developer specializing in software engineering. Experienced in React.js, Next.js, React Native, and NestJS, with a strong foundation in programming fundamentals. Motivated to apply technical knowledge to real-world projects, collaborate in developer communities, and grow into a full-stack software engineer.

WORK EXPERIENCE

Software Developer - ITKAN.CO - Algiers, Algeria (Hybrid)

11/2025 - Present

- Qateei – Developed a React Native mobile app for farm management for the state of Algeria (cows, milk production, reproduction cycles), integrated React Query, Redux, i18n, and Expo Secure Store.
- DZ Seminars – Developed a seminar management web application using Next.js to help Algerian universities organize, schedule, and track academic events and attendance, streamlining university seminar coordination.

Frontend Developer - CloudCodeSA - Remote

10/2025 - 03/2026

- Contributed to Outfit, a multi-vendor e-commerce platform featuring a customer storefront, admin dashboard, and vendor dashboard for sellers to manage inventory and track sales.
- Contributed to WalaaPoints, a loyalty program system handling points accrual, tier-based rewards, redemption logic, and transaction history.

React Developer - SOCIALGOODS - Singapore (Remote)

09/2025 - 10/2025

- Contributed to the development of a custom Content Management System (CMS) designed to streamline digital content creation, management, and publication, supporting multiple content types and user roles for diverse client needs.

Freelancer & Self-Employed - - Algeria

06/2024 - 07/2025

- Designed and developed mobile applications using React Native, including payment features integration.

PROJECTS

VinFlem

- Mobile app MVP – a service that makes selling effortless by connecting businesses with locals in their vicinity.

MultiMind – MCP Server

- An intelligent tool designed to simulate human-like constructive debate between multiple large language models (LLMs).

EDUCATION

National School of Advanced Technologies – Algiers, Algeria

- Bachelor of Systems Security
